PERSONAL PROJECTS

Musico

- A one-in-all integrated social media platform for musicians to connect with one another.
- Musicians can swipe through their feed to discover users who have uploaded their music covers in similar genres. Upon connecting they can chat with one another.
- Users can upload requirements and queries related to music through a common forum page.

Scholine Plus

- A web-based student management system that is being used by a reputed school in Assam to track and manage student records.
- Admins can create and view student and student records, and record admission and monthly payments.

Courierpad

- A business-facing android application to track and manage courier deliveries.
- Admins can add orders and delivery agents to the database. For an order, the admin can select from a list of available delivery agents.
- Delivery agents also has their separate dashboard where they can see a list of the orders that they have completed, and their currently assigned order.

BuddAlert

- An android application to set location-based alarms and reminders.
- Users also have the option of notifying some contacts about their current location after a set interval.
- The application also has a SOS feature which send current location immediately to saved contacts and also starts recording surrounding sounds.
